

KARTHIK T

Aspiring Data Analyst · Power BI · SQL · Cloud Data Pipelines (AWS · Snowflake · BigQuery)
Bengaluru, Karnataka, India | +91 76762 78529 | karthikkarthi18012008@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.Tech AI & ML student (REVA University, SGPA 9.4+) with hands-on experience across the full analytics workflow — Power Query transformations, data modeling, DAX, and dashboard design in Power BI and Tableau, including a cloud-based pipeline (AWS S3 to Snowflake to Power BI). Comfortable working with SQL and Python on datasets exceeding 100K records. Seeking a Data Analytics internship to contribute from day one.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

REVA University, Bengaluru Expected 2029

SGPA: 9.35 (Sem 1) | 9.48 (Sem 2)

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy), SQL

Data Science: Feature Engineering, Statistics, Data Visualization

Analytics & Visualization: Power BI, Tableau, Excel

Power BI: Power Query, DAX, Data Modeling

Databases & Cloud: Microsoft SQL Server, Google BigQuery, Snowflake, AWS S3

Tools: Git, GitHub

PROJECTS

Agriculture Climate & Yield Analytics — AWS, Snowflake, Power BI

- Built a 4-page Power BI report analyzing rainfall, temperature, humidity, and crop yield across locations, crops, seasons, and years, sourced from a Snowflake data warehouse fed by AWS.
- Connected Power BI to a published cloud dataset rather than a local file — end-to-end exposure to a cloud storage to data warehouse to BI pipeline.

Housing Market Analysis — Google BigQuery & Power BI

- Analyzed a 100K+ record housing dataset using Google BigQuery and Power BI.
- Performed data transformation, modeling, and DAX-based analysis to identify housing market trends.

Sales Performance Analysis — Power BI

- Built an interactive dashboard to analyze sales, profit, orders, units sold, discounts, and product performance.
- Used Power Query, DAX, and data modeling to create KPIs, trends, and interactive analysis.

UPI Transaction Data Analysis — Tableau

- Analyzed UPI transaction data and built interactive Tableau dashboards to surface spending trends and patterns.
- Used filters and calculated fields for interactive data exploration.

HACKATHON EXPERIENCE

FarmFresh — AI-Powered Farmer Marketplace 2026

x402 Global Challenge PreHack

- Contributed to Supabase database setup, product/order workflows, and backend integration.
- Worked on x402 payments, Algorand Testnet payment flow, Pera Wallet integration, and payment verification.
- Performed end-to-end debugging and testing of marketplace and payment workflows.
